

Vitamin supplements are a great way to keep your body balanced. Coupled with your daily vitamin regiment, routine Nutrition IV Therapy can help you achieve optimal health and wellness.

ENHANCE YOUR HEALTH

Intravenous Therapy

Intravenous (IV) Therapy is a treatment method which uses nutrients such as vitamins or minerals and administers these directly into the bloodstream typically through a vein in the arm. By injecting substances directly into the bloodstream, you eliminate any alteration in the nutrients which may occur from the actions of digestive enzymes. The amount of nutrients in the blood can reach much higher, more therapeutic levels faster than is possible by absorbing nutrients through the Gastro-Intestinal system.

IV TESTIMONIALS

“Between work and the family, I barely have time to take care of myself. IV Therapy gives me the energy to tackle every day.”
~ Robert Parson

“I pushed myself too hard in the gym and felt a soreness like never before. The Hydration IV brought me immediate relief and I was ready for another workout.”
~ Eric Byrd

“Words can’t express how amazing I feel right now. I left work earlier in tears, feeling so sick and dizzy. Within seconds of the IV, my nausea went away. This was life-changing!”
~ Jeanne Salis

Nutrition IVs

REJUVENATION

Our skin is a sensitive organ that reacts not only to external forces, but what comes from within our bodies as well. Treat yourself right inside and out with a special blend of vitamins and nutrients designed to suppress the formation of acne and produce collagen to enhance elasticity and much more.

IV nutrients enter your bloodstream directly and immediately help the body begin to heal itself.

DIET & DETOX

If your goal is to lose weight, you are not alone. Two-thirds of adults in the United States are obese or overweight. A healthy lifestyle including a proper diet and exercise are critical to attaining weight loss goals, but a vitamin IV can help jumpstart the process. Our Diet & Detox IV drip is formulated to put your metabolism into overdrive.

Better Absorb and Utilize Essential Nutrients

MYER'S COCKTAIL

Approximately 45 million Americans suffer from chronic headaches, and of them, 28 million suffer from migraines. Herbal remedies, Vitamin supplements, Western medications and dietary changes are some of the common headache treatments. A vitamin IV drip works to relax blood vessels and skeletal muscle and kick that headache to the curb.

Fatigue is a debilitating health issue. The bottom line is that when you feel tired, even the simplest of tasks can seem impossible. The classic Myer's Cocktail is used to treat many chronic illnesses, fatigue, viral infections, muscle aches and more, giving you the boost to take on your whole day.

MENU

DIET & DETOX - \$175

Boost metabolism and energy, detoxify your vital organs, eliminate excess body fat, reduce hunger cravings, fit into those jeans and much more.

REJUVENATION - \$195

Reduce fine lines and wrinkles, suppress formation of acne and blemishes, and produce collagen to enhance elasticity, healthy skin and much more.

HYDRATION - \$125

Exercise Fatigue, General Exhaustion, Hangover, Skin Complexion, Seasonal Illness, Jet-Lag and much more.

MYER'S - \$150

Hectic 24/7 lifestyle – such as stress, depression, headaches, a weakened immune system, allergies, muscle aches, fatigue, difficulty in concentrating, poor food and nutrition choices.

HYDRATION

Sure you had a good time last night, but now that the party is over, you are paying the price. If you are unfortunate enough to have experienced a hangover, you know how debilitating they can be. Jumpstart your recovery process with a Hydration Vitamin IV drip.

October marks the start of the flu season, which peaks in January and February and goes through May. We all do our best to prevent getting sick by avoiding those infected, staying hydrated and frequent hand washing. Give your immune system a boost with high doses of antioxidants and immune system supporters.
